Paint, moss or lichen removal

Soda blasting is a relatively new process. Developed in The USA our process, blast media and equipment have been refined to the extent that it is all fully purpose specified and built achieving very high effectiveness and efficiency levels. The process has been proven in New Zealand over recent years with many pools having been successfully stripped ready for repainting.

The Mighty 'Buster Blaster' Unit

We have the very latest machine and technology imported especially for you and your tasks. The 'Buster Blaster' machine is the only purpose built and patented Soda Blasting machine in the world.

It's fast

In the pool industry we remove the paint without harm to the substrate or tiling, lights or fittings. We can do it quickly, saving you time and money.

Pool fittings do not need to be removed or masked for our process.

Tiles are not damaged in any way, rather they are enhanced by a thorough clean.

Outdoor Wooden Furniture

We can pick up or you can drop it off at our depot in Te Atatu Peninsula. We clean it up ready for you to lightly sand and re-coat. Brass and other metal fittings come up like brand new.

It's safe

Our Soda Blasting uses environmentally friendly 100% pure baking soda as its media. It is non abrasive; rather it uses the explosive impact of the media crystals to remove the coating. We use food grade baking soda, at a specific crystal size. Over spray can be safely washed away.

We come to you with our mobile unit.

We remove our mess.
